

To whom it may concern,

I am angry about the FCC's involvement with XM Radio. I am paying a monthly service fee, and I am entitled to hear what XM is broadcasting, and the national association of broadcasters should not dictate what I can or can't listen to.

I commute everyday in Chicago to and from my job, which means I am always on the busy Chicago roads. I can't wait for a traffic update every 15 minutes, I need to know IMMEDIATELY, and XM allows me that luxury.

XM provides strong content that isn't available on the regular radio stations.

I urge you to respectfully reject NAB's petition 04-160.

Thank You,

Matthew Howe
